Ecoaction Project Intake Report

Date: March 7, 2026 **From:** Tom Protzman **To:** Sloan Austermann **Re:** Incoming project submissions from Ecoaction (Kostia Krynytskyi)

Overview

Kostia has submitted the first batch of municipal project requests through Ecoaction. The submission includes:

- **41-slide Canva presentation** with project summaries from municipalities across Ukraine
- **2 fully documented projects** with engineering assessments, cost breakdowns, and technical reports (Samar hospital solar, Lychkove water tower)
- **Ecoaction brochure** with 3 Volyn region projects (likely overlaps with Canva slides)
- **~20 additional projects** expected Friday from Ecoaction's municipal competition

After filtering out NGO submissions (not municipal — slides 2, 19-22, 41 per Kostia), we have **~36 municipal projects** across 9 oblasts.

The existing 66 demo/placeholder projects need to come off the site before these go on.

Filtering Notes from Kostia

- **Skip slides 2, 19, 20, 21, 22, 41** — NGO submissions, not municipalities
- **Relocated communities:** Pokrovsk, Novohrodivka, Selydove, Dobropillia — their hometowns are occupied, projects are in host communities in western Ukraine
- **Frontline communities** flagged throughout
- **Coal plant transition towns** flagged (Zelenodolsk, Slobozhanske, Ladyzhyn, Dobrotvir, Pryiutivka)
- **Ecoaction director approved logo usage** on the platform

Project Inventory

Tier 1 — Ready to List (Full Documentation)

These have engineering assessments, itemized cost breakdowns, and technical reports.

Community	Region	Project	Facility	Cost	Notes
Samar	Dnipropetrovsk	Solar 150kW	Surgical Dept, Central Hospital	**$568,690**	Full engineering docs, roof assessment, 10% municipal cofinancing
Lychkove	Dnipropetrovsk	Solar 10kW	Water tower	**$33,550**	Full engineering docs, cannot cofinance

---

Tier 2 — Strong Submissions (Cost Estimates + Details)

These have cost estimates and project descriptions but may need additional documentation.

Community	Region	Project	Facility	Cost	Flags

Novovolynsk	Volyn	Heat pump + Solar 140kW	Lyceum No. 6 swimming pool	€325,450	
Novovolynsk	Volyn	Solar 23kW + roof repair	Children's Sports School	€99,300	
Sheptytskyi	Lviv	Solar 12kW	Municipal enterprise + disability services	$11,269	Detailed budget provided
Nadvirna	Ivano-Frankivsk	Solar PV	Children's Hospital roof	~~1.7M UAH (~~$41K)	
Nadvirna	Ivano-Frankivsk	Thermo-modernization	Central District Hospital (inpatient)	~~11.5M UAH (~~$280K)	43% projected heat reduction
Samar	Dnipropetrovsk	Solar 30kW hybrid	Dental Clinic	12M UAH (~$290K)	Frontline
Samar	Dnipropetrovsk	Thermo-mod (facade + windows)	Dental Clinic	5M UAH (~$120K)	Frontline
Samar	Dnipropetrovsk	Facade insulation	Primary Health Care Center	34.4M UAH (~$835K)	Frontline, has design docs
Samar	Dnipropetrovsk	Energy monitoring	Community buildings	2.5M UAH (~$61K)	Frontline
Zelenodolsk	Dnipropetrovsk	Solar 43kW + battery + boiler	Lyceum No. 2	20M UAH (~$485K)	Frontline
Ladyzhyn	Vinnytsia	Solar 500kW	Rehabilitation Center	25M UAH (~$607K)	Coal plant town
Pryiutivka	—	Solar 50kW hybrid	ASC + dormitory + kindergarten	3M UAH (~$73K)	50% cofinancing
Slobozhanske	Kharkiv	Solar PV	Admin Service Center	~€14,487	Coal plant town
Velyki Mosty	Lviv	Water treatment modernization	Second-lift pumping station	16M UAH (~$388K)	Has existing project docs

---

Tier 3 — Large Infrastructure (Need Scoping)

These are significant infrastructure projects that may be too large for individual donor funding or need further scoping.

Community	Region	Project	Facility	Cost	Flags
Novovolynsk	Volyn	IDP Housing Construction	Residential building	€2.85M	Not energy — housing
Troitske	Dnipropetrovsk	Solar PV (up to 2 MW)	Municipal institutions	50-100M UAH ($1.2-2.4M)	Frontline
Zelenodolsk	Dnipropetrovsk	Heating infrastructure	City heating networks (12.8km)	50M UAH (~$1.2M)	Frontline, coal plant
Zelenodolsk	Dnipropetrovsk	Water supply replacement	54km pipelines	250M UAH (~$6M)	Frontline
Dobrotvir	Lviv	Thermo-mod + heat points	Public buildings + housing	155M UAH (~$3.8M)	Coal plant, 2yr timeline
Velyki Mosty	Lviv	Biomass CHP plant	Bioenergy cluster (waste-to-energy)	600M UAH (~$14.6M)	Largest project submitted
Velyki Mosty	Lviv	Thermo-mod + renewables	Educational infrastructure	70.5M UAH (~$1.7M)	

Tier 4 — Needs Feasibility Study

These municipalities expressed interest but don't yet have cost estimates or engineering assessments.

Community	Region	Project	Facility	Flags
Petropavlivka	Dnipropetrovsk	Solar PV	Lyceum No. 2	Frontline
Petropavlivka	Dnipropetrovsk	Solar 90kW + battery	Water intake facility	Frontline
Petropavlivka	Dnipropetrovsk	Solar PV	Lyceum No. 1	Frontline
Karpivka	Dnipropetrovsk	Solar PV + battery	Preschool "Kazka"	Frontline
Karpivka	Dnipropetrovsk	Solar PV + battery	Karpivskyi Lyceum	Frontline

---

Relocated Communities (Special Category)

These municipalities have been displaced from occupied territories. The projects are located in their host communities in western Ukraine.

Original Home	Host Location	Project	Facility	Cost	Notes

Novohrodivka (Donetsk)	TBD	Solar hot water	IDP Temporary Accommodation	~~3M UAH (~~$73K)	
Pokrovsk (Donetsk)	Neresnytsía, Zakarpattia	Solar PV	Rehab Center "Myloserdia"	~~3M UAH (~~$73K)	
Pokrovsk (Donetsk)	Lypcha, Zakarpattia	Solar PV	Elderly care "Zatyshna Oselya"	~~3M UAH (~~$73K)	Needs reconstruction first
Dobropillia (Donetsk)	Sosnivka, Sheptytskyi (Lviv)	Solar PV + eco-shelter	IDP shelter	~$75K	
Selydove (Donetsk)	Berezivka, Odesa	Solar PV (3 bldgs)	Residential building	€4.4M	Town is occupied
Selydove (Donetsk)	Mykolaivka, Odesa	Solar PV (3 bldgs)	Social Services Center	1.2-2.4M UAH/bldg	Town is occupied

---

Other

Community	Region	Project	Cost	Notes
Pryiutivka	—	Renewable energy feasibility study for former coal sites	1.5M UAH	Study, not construction
Kamianske	Dnipropetrovsk	Energy-efficient computers (73 units) for ASC	3.3M UAH	IT equipment, not infrastructure

---

Decisions Needed

1. **Which projects go on the site first?** Tier 1 (Samar hospital + Lychkove water tower) are the strongest — full engineering docs, clear costs, real community need. Recommend starting there.
2. **Do we wait for Friday's batch?** ~20 more projects coming from Ecoaction's competition. Could load Tier 1 now and batch the rest, or wait and do one big load.
3. **How to handle relocated communities?** These are compelling stories — occupied towns rebuilding in host communities — but the site currently shows projects by municipality location. Need to decide how to present "Pokrovsk → Zakarpattia" on a map.
4. **What's the cost ceiling?** Tier 3 projects range from $1.2M to $14.6M. Are these realistic for individual donor funding, or should they be set aside for institutional/government funding?
5. **Non-energy projects?** IDP housing (€2.85M), computers (3.3M UAH), and the feasibility study don't fit the current energy/infrastructure focus. Include or filter?
6. **Old projects?** The 66 existing projects need to come off the site. Timing — before or simultaneously with new project upload?

Summary by the Numbers

- **36 municipal projects** across 9 oblasts (after filtering NGO submissions)
- **2 fully documented** and ready to list
- **14 with cost estimates** and strong details
- **7 large infrastructure** projects needing scoping
- **5 need feasibility studies** before listing
- **6 relocated community** projects (special presentation needed)
- **2 miscellaneous** (computers, feasibility study)
- **Cost range:** $11,269 to €4.4M (~$14.6M for biomass CHP)
- **~20 more projects** arriving Friday
