From Ukrainian communities to American donors

hromadaproject.org
501(c)(3) · EIN 99-0392258

Ukrainian communities are rebuilding. Support them.

Hromada connects US donors directly with Ukrainian municipalities rebuilding critical civilian infrastructure — hospitals, schools, water systems — with renewable energy.

Community Agency

- Communities identify what they need. They request it. They rebuild it.
- Ground-up model: supplements top-down channels like United24 by going straight to municipalities.
- Direct connection, no platform fees — unlike intermediaries like GlobalGiving.

Energy Security

- Decentralized renewable energy: solar PVs, battery storage, heat pumps, thermo-modernization.
- Hard security: hospitals and schools that run during blackouts and grid attacks.
- Human security: communities that heat, power, and sustain themselves independently.

Total Transparency

- NGO partners verify every project on the ground — feasibility, cost, and community impact.
- All procurement through Prozorro, Ukraine's mandatory public e-procurement platform — every transaction auditable.
- Donor dashboard tracks your project from funding to completion — timeline, status updates, photos.

Maximizing Your Dollar

100% to projects
Overhead funded separately by grants

Minimal fees
Just the wire transfer

Tax-deductible
501(c)(3) fiscal sponsor

Candid Platinum Seal
Highest transparency rating

How It Works

1. **Communities bring the need** — Municipalities submit requests through partner NGOs
2. **Partners verify on the ground** — NGOs assess feasibility, cost, and community impact
3. **We publish their request** — Verified projects go live for US donors
4. **You fund their plan** — Donation goes directly to the municipality
